Letter of notice to assistant police commissioner Neil Basu

Chair of The counter-terrorism coordination Committee

My name is Gayzer Frackman a lawful, flesh and blood freeman of this country, who has caused no loss, harm or injury, and bare no ill will to anyone. Who is not affiliated to any group, party or organisation?

Yet your force have arrested me on five occasions with no charges or fines. For exercising my right to question a government of traitors and provide evidence for you to investigate the crimes against the British people.

Today I put you on notice of impending legal action against you, for your insightful posturing with both derogatory and hurtful remarks against (what you call) anti-vaxxers and their rightful concerns against a government who are hell bent on vaccinating all in our nation, no matter what the cost or damage to our health and economy.

My back ground Mr Basu! is working hard to successfully stop a Tory government (supported by Labour) from fracking our county (of Lancashire) and Country for nearly ten years. Driving Lord Browns Cuadrilla from Preston New Road and four other sites in Lancashire. I am here to challenge your insulting remarks made lately about anyone questioning the destruction of our health and economy based on the fraud of covid-19 and to question big Pharmaceuticals like Pfizer and GlaxoSmithKline (amongst others) who have a long record of losing court cases for criminal behaviour and deaths of innocent people, including children.

I am here to question your motives and professional integrity on making such unfounded statement against (what I would like to call) damaged-vaxxers who are being discriminated against for warning others of the real threat to health including death from vaccines. And big pharma who have been fined billions for damages and have set aside over six billion for

future damages. This is a disgrace as these families and those harmed by toxic vaccines face the reality every day and statements like yours are both hurtful and discriminatory.

I want to give you the benefit of doubt. In my long fight against the toxic industry of fracking and with the full support of pro-fracking government, I came up against being targeted and labelled a domestic terrorist and radicalising young people, this is understandable if you look who we were taking on and the influence that The head of Cuadrilla Lord Browne, who was sat at the same table of our Prime Minister David Cameron. Both have now gone and that tag was challenged and an apology given.

Imagine my surprise when I find you 'Neil Basu', (assistant police commissioner and anti-terrorist specialist) in the same building as Boris Johnsons chief advisor, Sir Patrick Vallance. Who I have attempted to speak to and set up meetings with, (along with Boris Johnson and Chris Whitty) so far no joy. I can understand if your only information (Like Lord Browne with Cameron) is coming from a man with £600.000 invested in GlaxoSmithKline, you would think that those protesting against the fraud of Covid-19 and the deliberate damage being inflicted on innocent people like myself. You could have a skewed view of the facts.

So what are your motives?

Here are some charges and fines, hard fought for and won in many courts around the world.

I would like your thoughts on Pfizer who paid the biggest fine in history \$2.3billion for drug breach in **USA**

Pfizer to pay £50million after deaths of **Nigerian** children in drug trial experiment. Evidence heard in court, are you going to insult the parent of these children because they are not British children?

Pfizer pay \$60m for corruption violation in **Russia**

GlaxoSmythKline fined \$490m for bribery in **China**

GSK set aside \$6.4billion for future lawsuits and settlements

Met Assistant Commissioner Neil Basu said 'misinformation could cost lives'

[\(Full article accompanies this letter\)](#)

He added striking a balance with free speech was a 'debate for society to have'

Islamist and far-Right groups use false Covid-19 claims to groom recruits

I have a suggestion

Mediation

Let's debate who spreading misinformation that is costing lives and be allowed to give supporting evidence with '**ALL**' expert views listened to, not just those who are set to profit from our demise as a leading nation in the World.

Radicalisation, are the advisors controlling our government and they are the ones keeping children from schools for months allowing for them to brain washed by fear media and masks.

I would charge Cressida Dick with radicalisation and incitement when she instructs people to “shame people who are not wearing masks”.

I have supplied evidence that urgently needs investigating and those who are the real terrorists in government and advisors need to be charged and brought to justice.

If you are a man of honour and integrity you would be advised to begin the correct steps to arrest the criminals and protect the innocent.

I welcome rational debate and finding a solution to how we get our country working again and people seeing their doctors and receiving the treatment they pay for in their national insurance.

Signed

Geza Tarjanyi
