OPEN LETTER - By Hand

The Rt. Hon. Boris Johnson MP, Prime Minister
10 Downing Street
London SW1A 2AA

24 October 2020

Dear Mr Johnson

Hydroxychloroquine (HCQ), remedy for Covid-19

I hereby put you On Notice, following receipt of this letter and the documentation to which it refers, that I hold you personally liable for even just one more death attributed to Covid-19, stemming from your decision NOT to make Hydroxychloroquine available to the British public.

As your chief medical and scientific advisers should have informed you, HCQ is a proven effective prophylactic as well as treatment for Covid-19. I draw your attention to the Oxford University 'Recovery' trial (Hydroxychloroquine arm) mentioned by Professor Whitty in a recent conversation, which testifies to high doses of HCQ having been administered to patients in hospital, causing great physical harm and possibly death, in an effort to discredit this drug.

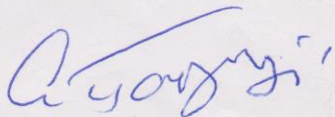

Documentation clearly setting out the effectiveness of HCQ in the fight against Coronavirus is today being sent to you and your advisers by email, to which it behoves you to pay all due attention, as within a very short space of time the entire public of this country will have become aware of your personal failure to protect the British people and 'Save Lives', as continuously incanted throughout 2020 by you, Prime Minister and your Health Minister, from the safe confines of your official residence.

For many, especially the nation's children and young people, 2020 has been a traumatic year. You yourself are father to a number of children, the youngest still a baby. Why have you seemingly so little care for what you might be unleashing on all these innocents in their lives going forward, as well as the bewilderment and distress already imposed on them?

You and your chief medical and scientific advisers, to whom I copied my previous letter of 30 September requesting a meeting with you (yet received no reply to that, despite it being delivered to all three of you by hand to your offices, as well as sent by email) need to come clean with the British public and admit your malfeasance & misfeasance in public office, if such it is. The public will find it very hard to accept that none of you were aware of the deception being practiced on you.

This is all I am saying to you today; please reflect on your position over the weekend and this time around please do not ignore me. I and my own medical and scientific advisers are ready for peaceful engagement with you and your advisers and fellow Ministers to sort out the current problems and move forwards towards a healthier and happier future for all in this wonderful country we love and call home.

Yours sincerely

 24-10-2020

PS After the threats and stigmatisation of doctors who have had the courage to speak out in favour of HCQ, we demand an immediate Inquiry into the evidence of medical malpractice in suppressing it.

Cc Professor Chris Whitty, Chief Medical Officer; Sir Patrick Vallance, Government Chief Scientific Adviser
